ISPARTA

Lavender

Known as the most elegant of the flowers, lavender offers a visual feast with its dazzling tones of purple and gives peace with its unique fragrance.

LAVENDER'S **ADVENTURE**

• Flower offshoot (awakening) starts in May
• First flower appears around June 20-25
• Maturation period is around 15-20 July and they are cut in bundles after this period.
• Starting around 20 - 25 July, lavenders are cut to be dried.
• Harvesting and processing lavenders for products such as lavender oil and lavender water starts around 1-5 August and lasts until the end of August.

Kuyucak Village of Isparta Keçiborlu District has been growing lavenders for 40 years and meets 90% of the domestic demand.

NATURAL PHOTOGRAPHY STUDIO, **ISPARTA**

You can see the lavender's adventure from the beginning of July until the end of August. Lavender gardens form an open-air photography studio which offers postcard like photos that will remain as a souvenir for a lifetime.

REMEDY FROM NATURE: **LAVENDER**

Aside from its unique fragrance and elegant figure, lavender is often used in health and cosmetics sector.
• Strengthens hair follicles
• Good for fatty liver
• Relieves rheumatism and muscle pains
• Has calming and similar effects
Also, it is an essential input for home cleaning products due to its beautiful fragrance and protective properties against harmful insects.
